

HISTORY REVIVED

The International Society of the Rorschach and Projective Methods has renewed the tradition of this form of continuing education, which is held every year in between congresses.

Today, we are pleased to welcome members from all over the world and with different languages. We have found English to be a language common enough for us all to present the lectures. There will, however, be colleagues who can translate on informal basis into other major languages when needed, during the lectures/workshops in order to facilitate dialogue.

The seminar is capped at 30-35 participants (maximum) plus the Faculty. The small format gives everybody a chance to take active part in the discussions and get to know each other. We are offering lectures, workshops on case studies, and many informal discussions around the dinner table and coffee breaks. Since we have our meals together and stay at the same hotel, the environment is friendly and intimate.

XIV SUMMER SEMINAR 2023

GENOA, ITALY

RORSCHACH AND PSYCHOSES

July 14-16, 2023

FACULTY

Ali Khadivi, PhD

"Current Perspectives in Assessment of Psychosis"

Maria Fiorella Gazale, PsyD

"Efficacy of the Rorschach test in the diagnosis of psychosis by assessing the quality of perception and thought disorders. Comparison of results with different normative samples through the use of the CHESSES-2. Analysis of clinical cases according to J.Kleiger's integrated model in the analysis of Special Phenomena and according to the minisequence analysis model".

Joni Mihura, PhD, ABAP

"Charles Manson's 1997 Evaluation: The Rorschach in a Multimethod Approach to Assess for Schizophrenia"

SUMMER SEMINAR PROGRAM

The Summer Seminars run for 3 days, from July 14 to 16, 2023. Mornings are dedicated to lectures and theoretical presentations. The case material will be presented in the afternoon, after our lunch break. The case material is first analyzed in small groups of participants, then discussed in roundtable discussions between Faculty and all participants.

Participants will have the opportunity to interact directly with the Faculty. This will be an enjoyable and interesting opportunity for sharing the knowledge of researchers and clinicians from different schools and traditions who hold vast experience on the Rorschach. This is also an opportunity to make new friends and meet with colleagues from all over the world.
